Sep 2017 - Jan 2018
Responsibility is to design and develop web based applications, using Agile development approaches and advanced web technologies. To also lecture as a programming and web development instructor.
- GreenWhite Developers Lead Software
Software Developer
Jan 2018 - till date
Responsible for the consultation and co-ordination required during analysis and design of software programs, as well as for overseeing the work being done by any other software developer working on any project.
- Touching Lives Skills, Nigeria
Software Developer/IT Consultant
Feb 2018 - till date
Responsibility involves design and maintenance of the organization's IT infrastructure. Currently designed and maintained systems include a wallet management system for accounting, a student management system, a human resource management system, and a learning management system, for the organization.

Project Details

PROJECT : 1

- TLCareers
TLCareers is a Human Resource Management system with features for job application, live interview, online tests, lectures and certification. It manages the recruitment process of the organization.
It was developed using PHP/Laravel latest web technologies.
Period : 1 months
Status : Functional
Role : Full Stack Software Developer

PROJECT : 2

- Project Mahadum
Project Mahadum is a University Management System UMS I designed with advanced and improved features to coordinate student and staff management, learning management, and many other activities of the University system.

It was developed using PHP/Laravel, and latest web technologies.
Period : 2 years + (In Development)
Status : Functional
Role : Full Stack Software Developer

PROJECT : 3

- GreenWhiteDev SMS Gateway
It is a SMS gateway, designed to send SMS for developers via our API for clients. Over 20,000 SMS has been sent by this platform, using API for clients.

It was designed, and currently maintained at GreenWhite Developers
Period : 14 days
Status : Functional
Role : Full Stack Software Developer

PROJECT : 4

- TLPay

TLPay is a payment gateway, created to accept payments from TLSavings platform via API

It was developed using PHP/Laravel and latest web technologies, at Touching Lives Skills.

Period : 28 days

Status : Functional

Role : Full Stack Software Developer

PROJECT : 5

- TLSavings

TLSavings is a wallet management system.

The system operates on a virtual currency called Pneuma, and is used as a platform for transactions in the same currency. It enables conversion from one currency to the other, transfer of pneuma coins to other accounts, and others. It also has an API from which banks and other platforms can work with. Over 3900 students are registered on this platform

It was developed using PHP/Laravel, and latest web technologies, at Touching Lives Skills.

Period : 28 days

Status : Functional

Role : Full Stack Software Developer

PROJECT : 6

- TLSkills

TLSkills is a company website for Touching Lives Skills, Nigeria. It also includes a student management system for registration and management of students, and an integration via API to TLSavings to charge for student registrations. Over 2700 users are registered on this platform.

It was developed using PHP/Laravel, and latest web technologies, at Touching Lives Skills.

Period : 21 Days

Status : Functional

Role : Full Stack Software Developer

PROJECT : 7

- Blackloop

A Web Based investment returns platform that runs on a complex algorithm to reward users, and increase user level based on the number of users in the system.

It was designed at Tedikom Wireless

Period : 1 month

Status : Inoperative

Role : Server Side Developer

PROJECT : 8

- Bluegleam

A web based investment platform, running with its own currency which supports various transactions.

It runs on a complex algorithm to manage user transaction, rewards and bonuses.

It was designed at Tedikom Wireless

Period : 1 month

Status : Inoperative

Role : PHP Server Side Developer

PROJECT : 9

- A Call Based Security Alert System

This system makes use of a micro-controller to send call alerts to relevant persons/authorities in the event of a break in.

It was designed at Federal University of Technology Owerri (FUTO), as a Final Year Project.

Period : 9 months

Status : Inoperative

Role : Student

PROJECT : 10

- Jaco Innovation Hub

A company site and student management system, for student registration, performance evaluation and discussion forum.

It was designed using PHP/MySQL (CodeIgniter MVC), at Jaco Innovation Hub.

Period : 2 months

Status : Inoperative

Role : Full Stack Developer

PROJECT : 11

- Crime Report System

A crime report system that enables individuals report crime from any location through our app. The system then sends an SMS to the appropriate authorities or individuals.

It was designed as a student project using PHP, at Federal University of Technology, Owerri.

Period : 2 months

Status : Inoperative

Role : Programmer

PROJECT : 12

- Skill Acquisition System

Skill acquisition system is a Learning Management System that permits users to register for training to acquire new skills. The system keeps track of user's activity and performance.

It was designed as a student project using PHP, at Federal University of Technology, Owerri.

Period : 2 months

Status : Inoperative

Role : Full Stack Developer

PROJECT : 13

- Biometric Automated Teller Machine (B-ATM)

B-ATM is a simulation of an ATM Machine that authenticates users by their finger prints.

It was designed as a student project using PHP, and JAVA SE, at Federal University of Technology, Owerri.

Period : 2 months

Status : Inoperative

Role : Full Stack Developer

Field of Interests

- Software Development
- Single Page Applications (SPA)
- System Analysis and Design
- Database Management
- Programming
- Cloud Computing
- Data Mining and Machine Learning

Skills

- Programming (JavaSE, C#, C++, etc.)
- Web Development (PHP/MySQL with Laravel MVC and CodeIgniter, Vue.js, React JS, SASS, etc.)
- Mobile Hybrid Application Development
- Database Management (MySQL /Maria DB, PostgreSQL, MongoDB, etc)
- Site Optimization and UI/UX Design (HTML, CSS, jQuery, Bootstrap, Materialize, etc)
- Code versioning, sharing, deployment and tracking via Git (Github, Bitbucket)
- Cloud Services (Dropbox, Heroku, AWS S3, Mailgun, Mailtrap.io)

Strength

- Innovative
- Positive attitude
- Quick learning ability
- Deep and broad technical experience
- A good team player
- Great at time and task management

Hobbies

- Writing
- Prosody
- Singing
- Drawing
- Coding
- Photography
